| BIRDS                 |          |                      |              |
| Date                  | #        | Species              | Cause        |
| 30.12.2019            | 2        | Crow (Corvus Cornix) | Entangelment |
|                       |          |                      |              |
|                       |          |                      |              |
|                       |          |                      |              |
|                       |          |                      |              |
| <b>Total Birds</b>    | <b>2</b> |                      |              |

| MAMMALS              |          |         |       |
|----------------------|----------|---------|-------|
| Date                 | #        | Species | Cause |
|                      |          |         |       |
|                      |          |         |       |
|                      |          |         |       |
|                      |          |         |       |
|                      |          |         |       |
| <b>Total Mammals</b> | <b>0</b> |         |       |

1) Calculated at the end of the production cycle as: EUL = Stocking count – harvest count – mortalities – other known escapes

2) OIE is the World Organisation for Animal Health

3) Sensitive periods refers to juvenile outmigration of wild salmonids

4) Average lice count (# mature females/fish)

| SEA LICE COUNTS         |                   |
|-------------------------|-------------------|
| <u>Sensitive period</u> | <u>week 16-21</u> |
