

ASC Salmon Standard

Indicator 3.4.3: Estimated unexplained loss of farmed salmon is made publicly available.

Requirement: Yes

Applicability: All

Inventory difference at Humphrey Rock for the 2017YC was +3.34% (+17,793 pieces). Humphrey Rock experienced mass mortality events that led to the over-estimation of mortality counts on site. Humphrey Rock also shipped larger fish to Midsummer Island (average weight of 1.635kg), causing some double counting of fish. Midsummer Island was short 4,935 fish at the end of their harvest, thereby Humphrey Rock shipped out fewer fish than counted.
